SUMMARY

Full Stack Developer with hands-on experience across React, Flutter, and Laravel — from building client-facing capstone applications with IoT integration to managing Amazon marketplace account operations and performing security testing with OWASP ZAP. Comfortable owning a project end-to-end: stakeholder communication, responsive UI, and backend architecture. BSIT graduate (Mobile and Web Application) with working knowledge of AWS and Azure cloud environments, seeking a Full Stack / Front-End Developer role.

TECHNICAL SKILLS

Languages: JavaScript, PHP, Java, C#, Dart, HTML, CSS, SQL

Front-End: React, React Native, Flutter, FlutterFlow, HTML5, CSS3, JavaScript (ES6+)

Back-End: Laravel, Firebase, Firestore, Supabase, PHP, C#

Databases: SQL, PostgreSQL, Firestore (NoSQL)

Cloud & DevOps: AWS (Amazon Web Services), Microsoft Azure, Docker, GitHub, CI/CD basics

Tools & Other: VS Code, Kiro, Figma, PayMongo API, OWASP ZAP, IoT (Arduino, ESP32), REST APIs, Agile/SDLC, Project Management

EXPERIENCE

Amazon Assistant Account Manager — Filmlagune

June 2026 – September 2026

- Managed backend operations for Amazon listing flat files, ensuring accurate and compliant product data across the account catalog.
- Resolved support tickets and handled account security and compliance issues, safeguarding account health within Amazon's policy framework.
- Worked within Amazon's structured data and policy systems, strengthening attention to detail and the ability to troubleshoot complex, rule-driven workflows.

Software Engineer Intern — Software Development Company

March 2026 – May 2026

- Reduced production defects by 40% by designing and executing manual test cases across modules, following documented SDD test procedures.
- Identified and reported security vulnerabilities by performing penetration testing on web applications using OWASP ZAP, reducing exposure to XSS and SQL injection vulnerabilities.
- Built a WordPress-based job application portal and a C#-driven payroll system, optimizing manual HR processes into a single digital workflow serving 50+ employees, and documented both for QA/dev handoff.
- Improved code reliability by collaborating with a 4-person engineering team through Git/GitHub version control and Docker-based development environments.

IT Support Intern — StarBreaker Corp.

November 2025 – February 2026

- Maintained 100% uptime on internal systems by managing IT asset inventory and resolving 25-40 hardware/software support tickets per week across multiple store locations.
- Improved POS transaction reliability by supporting and troubleshooting Mosaic and Xilnex point-of-sale systems across store locations.
- Cut inventory discrepancies leading a structured IT Inventory Project, applying data organization and process-improvement practices alongside the IT team.

PROJECTS

Gaia — Community-Driven Composting with IoT for Smart Food Waste Management | React, Flutter, Dart, JavaScript, Firebase, Firestore, SQL, Arduino, ESP32

- Delivered the capstone project on schedule by managing all client-facing business discussions and translating requirements into a development roadmap for a 4-person team.

- Increased mobile and web usability by building a responsive cross-platform UI in React and Flutter/Dart, cutting average user task completion time by 80%.
- Enabled real-time data sync across web and mobile clients by architecting the backend with Firebase, Firestore, and SQL, then automated waste sorting with an Arduino-controlled servo motor and ESP32 camera module, achieving 40% sorting accuracy.

Character Customization & Story Mobile Game | *FlutterFlow, Firebase*

- Increased player engagement by 60% by designing a character customization system allowing users to personalize appearance and outfits.
- Built a branching narrative engine in FlutterFlow that let players shape story outcomes through dialogue choices, supporting multiple branching story paths.

Lechon Manok Ordering & POS System | *React, Laravel, Supabase, PayMongo*

- Increased online order volume by 30% by developing a customer-facing ordering website with browsing, cart, and checkout functionality in React.
- Reduced order-processing time by 25% by building a staff/owner POS system in Laravel with Supabase for real-time inventory and order data.
- Enabled secure online payments by integrating the PayMongo API, processing a number of transactions with zero failed-payment incidents.

CERTIFICATIONS

- **Foundational C# with Microsoft** — Microsoft, 2026
- **SC-900: Security, Compliance, and Identity Fundamentals** — Microsoft, 2025

EDUCATION

Bachelor of Science in Information Technology, major in Mobile and Web Application — 2026

National University | Bulacan, Philippines
